NEW DELHI 2 (INDIA);  
The 30th June, 1952

C. V. RAMCHANDANI,  
for Registrar General, India.

# NATIONAL SAVINGS CERTIFICATES

Available in three different series, maturing after 5, 7 and 12 years. The yield is 3%, 3·57% and 4·16% simple interest, respectively, at maturity. Thus, the 12 year-certificates money increases by 60% on maturity. Interest is free of income-tax and super-tax and is not taken into account in arriving at the total taxable income.

The certificates are obtainable from Post Offices doing Savings Bank business in denominations of Rs. 6, 10, 50, 100, 500, 1,000 and 5,000. An individual can invest upto Rs. 25,000, and two joint holders upto Rs. 50,000/-.

Full particulars obtainable from Post Offices, District Organisers of the Small Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers, or the National Savings Commissioners, Simla.

Deposits accepted in multiples of Rs. 100/- upto a maximum of Rs. 25,000 for a single depositor and Rs. 50,000 for two persons jointly. Interest at 3½% per annum (free of all taxes and not taken into account in assessing the total taxable income) is paid or remitted to the depositor's address every year. Deposits accepted at offices of the Reserve Bank of India at Bombay Calcutta, Delhi & Madras, and Branches of The Imperial Bank of India in other places transacting treasury business.

Full particulars obtainable from District Organisers of the Small Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers, or the National Savings Commissioners, Simla.

**3½%**  
**TEN-YEAR**  
**TREASURY SAVINGS**  
**DEPOSITS**

**TODAY'S BEST INVESTMENT FOR SMALL SAVERS**

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 7th June, 1952.

\*In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not sufficiently be reliable for calculating the birth and death rates.

†Figures not available.

Explanation of symbols used :—B.—Births ; B.R.—Birth Rate ; C.—Cholera ; S.—Smallpox ; P.—Plague ; F.—Fever ; D.D.—Dysentery and Diarrhoea ; R.D.—Respiratory Diseases ; M.D.—Maternal Deaths ; D.R.—Death Rate ; I.D.—Infantile Deaths (included in total deaths).

## REMARKS

The figures of births and deaths shown in this statement for week ending the 7th June, 1952, relate to 231 towns with an estimated population of 30,495 thousands. The total number of towns is 281 and their population is 34,545 thousands. Thus 82% of the total number of towns representing 88% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 14,882 and 9,106 representing birth and death rates of 25·4 and 15·5 per thousand of population respectively.

(A) States (Parts A & C).—The data here relate to 192 towns with an estimated population of 26,202 thousands. The total number of towns is 235 and their population is 29,351 thousands. Thus 82% of the total number of towns representing 89% of the total population is covered. The numbers of births and deaths recorded in these towns were

12,996 and 8,059 representing birth and death rates of 25·8 and 16·0 per thousand of population respectively. The table at the end gives the position by States.

Gondia in Madhya Pradesh was the only town which had a high death rate of 66·7 per thousand of population and this high death rate was mainly due to deaths from fevers.

(B) States (Part B).—The data here relate to 39 towns with an estimated population of 4,293 thousands. The total number of towns is 46 and their population is 5,194 thousands. Thus 85% of total number of towns representing 83% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,886 and 1,047 representing birth and death rates of 22·8 and 12·7 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
